

Test Case ID	Test Scenario	Priority	Browser	Prerequisites	Test Steps	Expected Result
TC_01	Verify the search works for different data types	High	Chrome, Firefox	URL: https://demo.prestashop.com/#/en/front User on homepage	Navigate to the search bar and Enter a product name and press Enter	should accurately display relevant products matching the name
					Navigate to the search bar and enter a product Category	Category relevant products displayed
					Navigate to the search bar and enter a product brand name	should accurately display products matching the brand name
TC_02	Verify if the search provides valid keyword	High			navigate to the search bar and type a valid word(Stationery)	Should suggest relevant products
TC_03	Verify if the search provides partial keyword	High			navigate to the search bar and type a partial word(Station)	The system should display relevent products as like valid keyword
TC_04	Verify if the search provides invalid keyword	High			Enter a invalid keyword(wqwqwq123)	System should show a "No search results for "wqwqwq123"" message
TC_05	Verify the search functionality case-sensitive or case-insensitive	High			Enter search for the product using all lowercase letters (hummingbird)	Should Same result as "hummingbird" products
					Enter search for the exact same word using all uppercase letters (HUMMINGBIRD)	Should Same result as "hummingbird" products
					Enter Search using random capitalization (hUmMiNgBiRd)	Should Same result as "hummingbird" products
TC_06	Verify Filter for different data types on the Search Results page	High			Search for a product, then Filter by Price	System should filter results correctly based on the selected data type.
				Search for a product, then Filter by Category		
				Search for a product, then Filter by Color		
TC_07	Verify that applies multiple filters (Like Price + Category) simultaneously	High		Go to Search Results page, select a Category (Women) from the filter sidebar, and set a Price range (\$10–\$50)	Search results should display products matching both the selected category and price range	
TC_08	Verify whether the sort is applied instantly or requires an "Apply" button	High		Go to the Search Results page, click the sort dropdown, and select any option	The sorting should apply instantly upon selection without button	
TC_09	Verify that the "sort by price" functionality works	High		Go to Search Results page and select the "Price: Low to High" option from the sort dropdown	Products should be displayed in ascending order based on their prices	
				Select the "Price: High to Low" option from the sort dropdown	Products should be displayed in descending order based on their prices	
Select the "Name: A to Z" option from the sort dropdown	Products should be displayed in alphabetical order (A to Z) based on their titles					
Select the "Name: Z to A" option from the sort dropdown	Products should be displayed in alphabetical order (Z to A) based on their titles					
TC_11	Verify that the "sort by Relevance" functionality works			select "Relevance" from the sort dropdown	Products most closely matching the search keyword should appear at the top of the list	

Test Case ID	Test Scenario	Priority	Browser	Prerequisites	Test Steps	Expected Result
TC_12	Verify default sorting on page load	Medium			Search Results page, and observe the sort dropdown value	The dropdown should show "Relevance" as the default selected option
TC_13	Verify if the "Clear All" button resets all applied filters in one click	Medium			Go to Search Results page, apply multiple filters, and then click the "Clear All" or "Reset" button	Clicking "Clear All" should instantly remove all filters and display the original search results
TC_14	Verify whether the search results use Pagination or Infinite Scrolling	Medium		Search results must have more products than the default limit per page(e.g. more than 12 or 24 products)	Perform a search that returns a large number of products and scroll to the bottom of the page to check for page numbers or auto-loading	Should show page numbers (Pagination)
TC_15	Verify the visibility of out-of-stock products in search and filter results	Medium		At least one product in the inventory must have a stock quantity of 0	Search for a specific product known to be out-of-stock and check if it appears in the results and if any "In Stock" filter hides it	Products appear with an "Out of Stock" label
TC_16	Verify system behavior for search inputs containing special characters	Low		The Search bar must be accessible on any page	Enter search queries containing special characters and observe the results and URL	Should ignore the character and search for the text OR show "No results found" gracefully without crashing
TC_17	Verify if frequently used search/filter results are cached for performance optimization	Low		A stable internet connection and a large product database	Apply a specific search/filter , note the load time, clear it, and apply the same search/filter again to compare response speed	The second time the same filter is applied, the results should load faster than the first time due to caching
TC_18	Verify that a product can be successfully added to the cart	High		The Product available	Navigate to the product (Hummingbird printed sweater), ensure it's available, and click the "Add to Cart" button	Should be added to the cart, a success message (modal) should appear, and the cart count should increase
TC_19	Verify that multiple products can be added to the cart successfully	High		Multiple products available	Go to the search results or product listing, add "Product A" to the cart, then find and add "Product B"	Both products should be added to the cart, and the cart icon should correctly reflect the total quantity((e.g. 2 items)
TC_20	Verify that the cart displays the correct items and details	High		Products (e.g. Product A and B) must be added to the cart previously	Navigate to the Shopping Cart page and verify the product name, attributes (size,color), quantity, unit price and the total order summary	The cart should correctly list both products with their respective attributes, individual prices, and the total count (e.g. 2 items)
TC_21	Verify the "Proceed to Checkout" process and order confirmation	High		The Shopping Cart must contain at least 1 item	Open the cart page and click on the Proceed to checkout, fill in details, and confirm the order	The order should be confirmed, an order reference (e.g. HJXHYZJGN) should be generated, and the summary must match the cart.
